Crystals are the “Powerbanks” of nature. Throughout thousands and even millions of years, Mother Earth has compressed the energies of the earth and the cosmos into the crystals. Since the crystals are made by Universal powers, they carry the energies and the consciousness of the Universe. The moment you open yourself for the loving & powerful energies of the crystals, you are able to connect to a wide variety of healing and empowering energies.

“The deep energies of the crystals have overwhelmed me. In connection with me, the crystals reveal all the secrets of the Universe. It makes me humble and silent” (Reflections after crystal course - Robin Groeneveld)
